

# INTESTINAL CONTENT EVACUATOR

This invention refers to an **EVACUATOR OF INTESTINAL CONTENT** used in conditions of **mechanical intestinal obstruction in emergency surgery**

Immediate, instant removing of the intestinal content contributes largely to the **preservation of sterility of the abdominal socket**

By the same, the **periods of the patient hospitalization and convalescence are shortened**

**1) Evacuator handle; 2) Conical evacuator body, upper part;**  
**3) Cylindrical evacuator body lower part; 4) Bag circle-holder fastening ruts; 5) Waterproof bag circle-holder; 6) Bag circle-holder fastening nipples; 7) Bag setting holes the nipples up; 8) Bag; 9) Bag holes protecting rings; 10) Bag fastening & waterproofing double adhesive band**
