

EXCLUSIVE MACHINE TRANSLATION SOFTWARE APPLICATION FOR FINANCIAL SERVICES AND DOCUMENTARIES (by **INVESIGMA COMPANY**)

Mohammadkhaled Feizi, Nezameddin Kharazmi, Farahnaz Farahmand Mohammadi, Zohreh Masserati Namini, Maryam Abdollahpour

ABSTRACT OF INVENTION

We intend to provide real-time translation software automatically updated for accuracy and transparency, covering cross-language translation. Our application offers accurate translations to avoid regulatory and legal problems. Invesigma has specialized translation services for financial documentaries, contracts, real estate, marketing, and investments. It also helps businesses and customers to extend their markets globally with secure translation. Invesigma acquires Artificial Intelligence and Machine Learning, covers multiple languages, and provides accurate and technically analyzed translation and interpretation without human involvement. This is the only application especially and individually designed for economical, financial, and business-related contexts. We have designed our application to be individually focused on specific financial and economic details and qualities. Invesigma can be used in many markets, such as Banks, business institutes and academies, individual business contracts, real estate agencies, etc. Our software, in general, will provide a comprehensive, accurate, interpreted translation for official financial documents and contexts at an affordable price. We are currently working on other aspects, options, and qualities of our application to make it more practical. Due to the high statistics of business partnerships and real estate sells in Canada with foreign countries worldwide, our software will be used worldwide widely.

INVENTION VISUALS & DESCRIPTIONS

Thanks to "Spark Center" and "Strike Up" for having "Invesigma" in this fantastic journey.

	PHASE 1 COMPLETED	PHASE 2 TO BE IMPLEMENTED PRIOR TO ARRIVING IN CANADA	PHASE 3 TO BE IMPLEMENTED IN CANADA
PLANNING	Requirements gathering, objectives and implementation strategy	Business plan complete, document complete, financial plan and budget	Final Planbook
REQUIREMENT ANALYSIS	Final approval, requirements review	Final approval, requirements review	Final Approval
SOFTWARE DESIGN	Software architecture, system design	Software Design, system design, software system, complete	Software product code complete
SOFTWARE DEVELOPMENT	Software development, testing, QA, installation	Software Development, testing, QA, installation	Software Development, testing, QA, installation
TESTING	Test plan review	Software Development, testing, QA, installation	Quality assurance testing, user acceptance testing, final code review, final code review, final code review
DEPLOYMENT	Software Development, testing, QA, installation	Software Development, testing, QA, installation	Software Development, testing, QA, installation
MAINTENANCE & IMPROVEMENT	Software Development, testing, QA, installation	Software Development, testing, QA, installation	Software Development, testing, QA, installation

In the world of business, 85 percent of people prefer to cooperate with those who know or speak the same language as them.

The number of languages which are spoken in the field of business is too big that makes it impossible to communicate with everyone.

Invesigma has provided an application that gives people the opportunity to accurately translate and interpret business contracts or business-related activities and projects.
